Obtain an IBM Cloud Feature Code

[Bookmark this page](#)

To facilitate hands-on skills development and enable you to complete some of the labs in this course, we are providing you with a special feature code for IBM Cloud.

This feature code will enable you to either create an IBM Cloud account without a credit card, or extend the validity of your existing IBM Cloud trial.

Please check the box and click on the Open tool button below to obtain a unique Feature Code and copy it. You will be able to apply it using the instructions that follow in a subsequent lab in the course.

NOTE: If you have already applied your IBM Cloud feature code in another course/lab to create an IBM Cloud account or extend its trial, please skip this item, as the code can only be used once.

user and programmatic access to all the Cloudant instances in your IBM Cloud account. See the [IAM guide](#) in the documentation for a comparison between using IAM and legacy Cloudant authentication for your applications.

In addition, IBM Cloudant instances support Resource Groups and we encourage all customers to migrate their Cloudant instances that remain in a Cloud Foundry space to Resource Groups to take advantage of the security access benefits. See the [FAQ](#) on using Cloudant with Resource Groups for more details.

IBM Cloudant Dedicated Hardware environment security enhancements

The IBM Cloudant Dedicated Hardware plan in the IBM Cloud catalog is for customers who require additional security and compliance benefits. IBM Cloudant Dedicated Hardware instances are isolated environments for the sole use of a customer to run one or more IBM Cloudant Standard plan instances. We have added the ability to connect via IBM's internal network, meaning customers can avoid public network and outbound bandwidth costs when connecting to Cloudant from their applications. With that, Dedicated Hardware environment now offer the following benefits:

- Isolation at the database compute and storage layers for a single customer
- Choice of any [IBM Cloud location](#)
- Optional HIPAA readiness in US locations
- Both external and internal [service endpoints](#)
- IP whitelisting
- Bring your own encryption key (BYOK) with Key Protect
